

Cabin Surveillance System (CSS)

Camera Surveillance Solutions are an effective method of monitoring all on board cabin activities, in the air or on the ground.

Eirtech's Solution provides a higher level of security, insuring against potential threats to passengers, cabin crew and personal belongings.

Up to 8 HD colour cameras can be connected at one time.

Wireless streams from all cameras to Electronic Flight Bag or airline security centre when at gate.

Features:

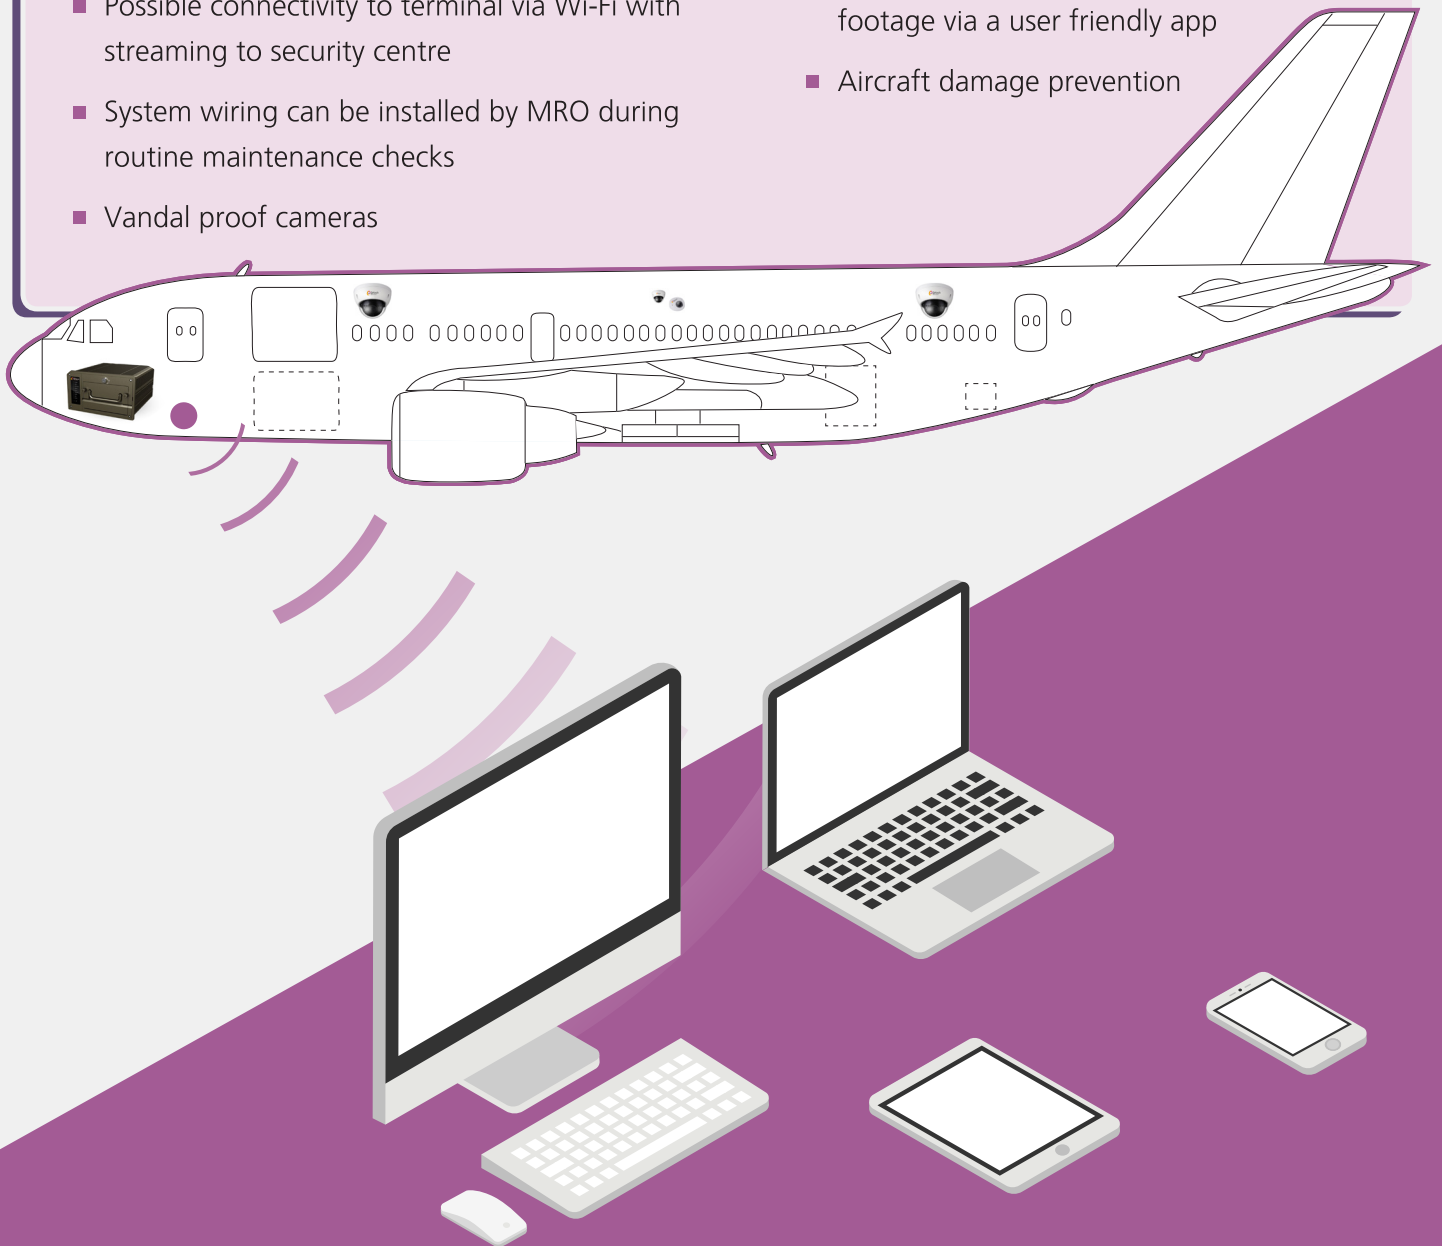

- Innovative, lightweight and cost effective solution to monitor aircraft cabin activity
- Deterrent against the increasing threat of luggage tampering and theft.
- Mobile Network Video recording – 6 months capacity
- EASA/FAA Approved Data Package – full installation kit with EASA Form 1

Customer advantages of using CSS:

- Lightweight and cost effective
- HD Cameras delivering quality images to EFB/iOS/ Android/Windows/Security Centre
- Mobile Network Video Recording – up to 6 months capacity
- Possible connectivity to terminal via Wi-Fi with streaming to security centre
- System wiring can be installed by MRO during routine maintenance checks
- Vandal proof cameras

CSS helps eliminate challenges:

- Luggage tampering and theft
- Event analysis for legal purposes
- False insurance claims
- Passenger and crew safety
- Cockpit and cabin crew can monitor footage via a user friendly app
- Aircraft damage prevention
