

Cargo Bay Surveillance System (CBSS)

Air Cargo theft is growing at a rate of 12% annually, The BSI (British Standards Institute) Global Supply Chain Intelligence Report identified US\$22.6 billion worth of losses due to cargo theft in 2016.

We have developed a Cargo Bay Surveillance System designed to assist in eliminating challenges in all areas of the cargo bay, increasing security, safety and protecting against theft.

Up to 8 HD colour cameras can be connected at one time. Wireless streams from all cameras to Electronic Flight Bag or airline security centre when at the gate.

Features:

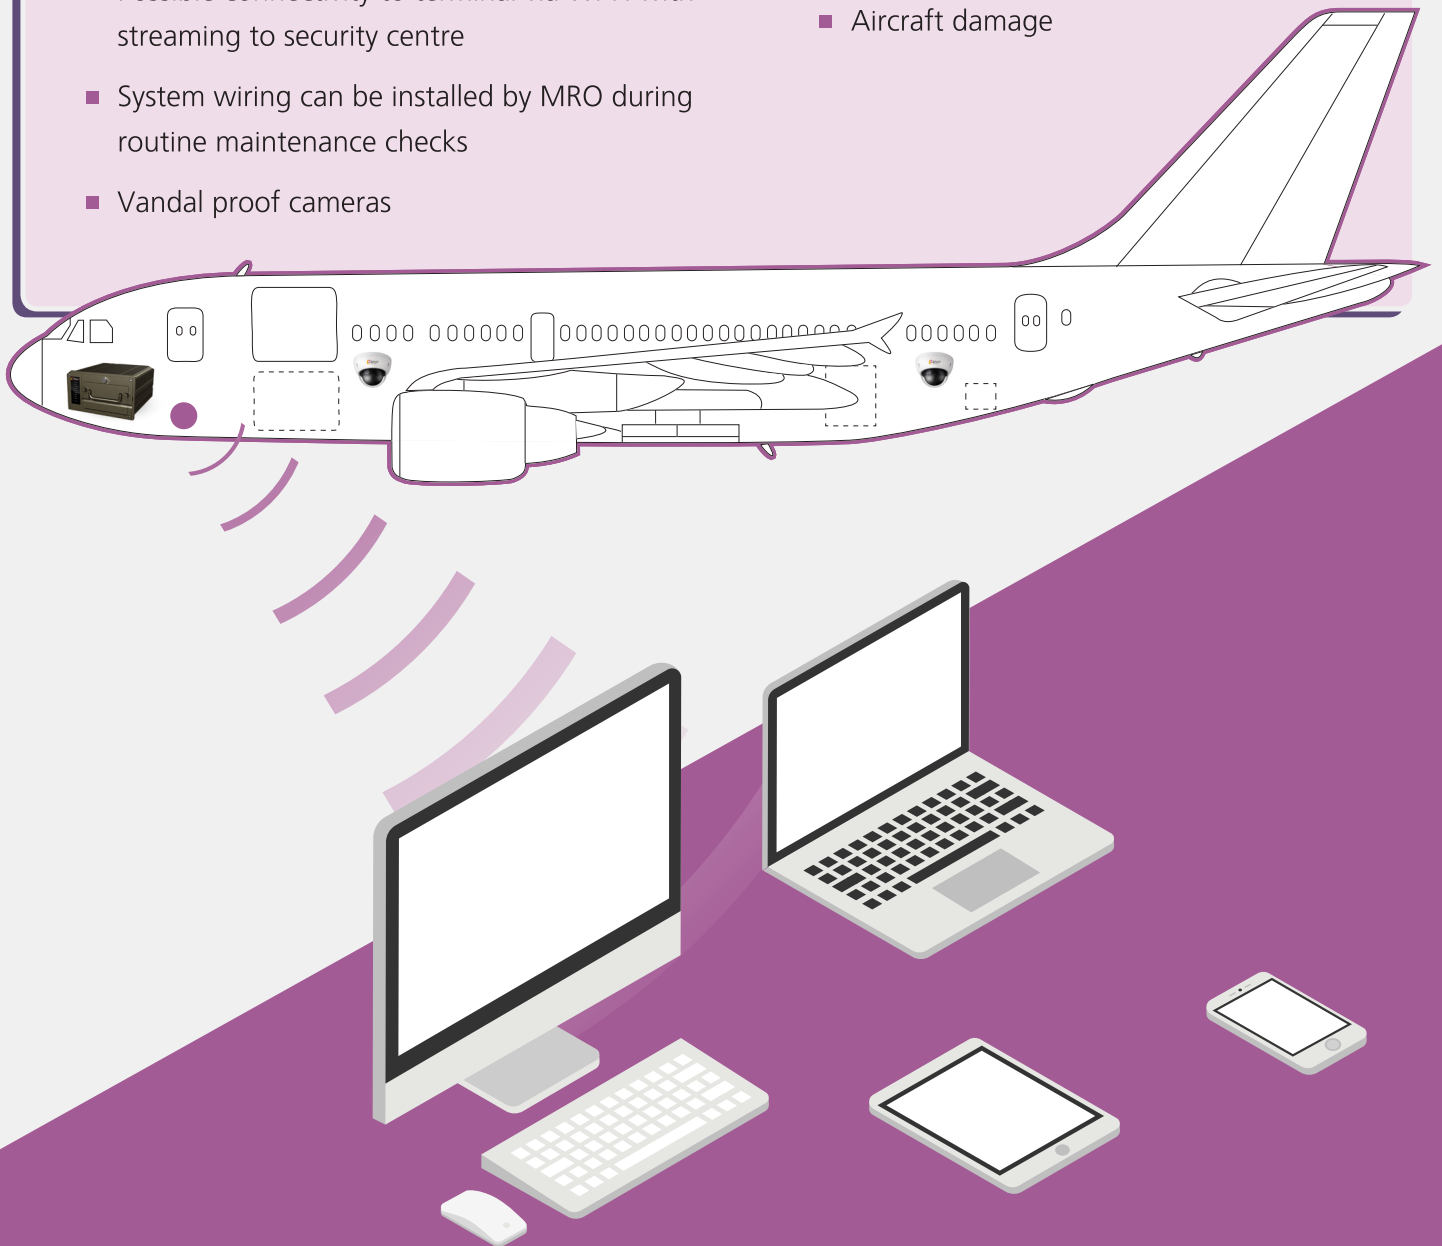

- Innovative, lightweight and cost effective solution to monitor cargo bay activity
- Enhance the security of your cargo bay
- Deterrent against the increasing threat of cargo theft
- Mobile Network Video Recording – 6 months recording capacity
- EASA/FAA Approved Data Package – full installation kit with EASA Form 1

Customer advantages of using CBSS:

- Lightweight and cost effective
- HD Cameras delivering quality images to EFB/iOS/Android/Windows/Security Centre
- Mobile Network Video Recording – up to 6 months capacity
- Possible connectivity to terminal via Wi-Fi with streaming to security centre
- System wiring can be installed by MRO during routine maintenance checks
- Vandal proof cameras

CBSS helps eliminate challenges:

- Unauthorised intrusion of Cargo Bay
- Security breaches
- False insurance claims
- Personnel performance
- Theft and tampering with cargo
- Aircraft damage
